

**STROJÍRNY
POLDI**

COMPANY PROFILE

STROJÍRNY
POLDI

HISTORY TIMELINE

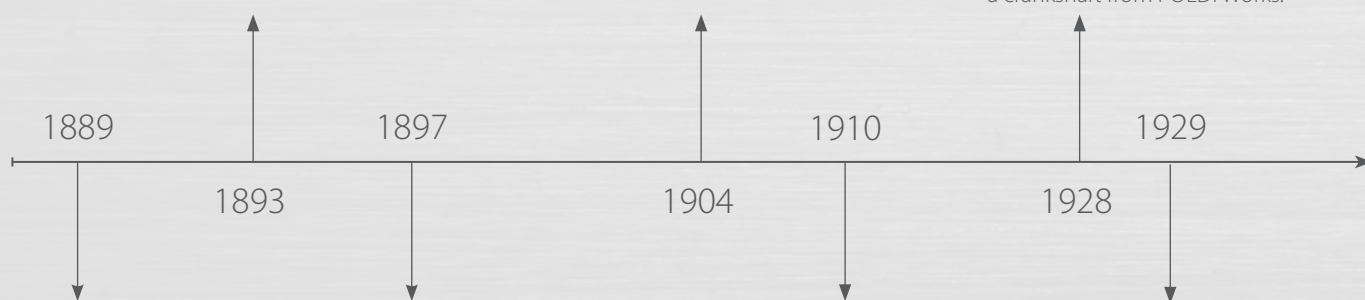

First registered
trademark of "POLDI".

Automotive crankshafts start to
be manufactured (e.g. for the
Austro-Daimler, Daimler Benz
and Saurer).

The Junkers W-33 "Bremen", the
first airplane that directly crossed
the Atlantic Ocean from Europe to
America, is being equipped with
a crankshaft from POLDI Works.

Karl Wittgenstein
establishes the Poldi
Steel Mill in Kladno
which he names after
his wife Leopoldine.

The production of the first
crankshafts for ship engines
starts in the finishing
department.

Registering of the
trademark POLDI, as it is
known until today.
First signs of production
of rolls for cold rolling.

The mechanical engineering plant
delivers all dollies with which the
entire Harbor Bridge in Sydney –
the largest single-arc steel bridge
in the world at that time – is being
riveted.

ABOUT US

Having more than 125 years' experience, STROJÍRNY POLDI, a.s. is one of the oldest Engineering and Machining companies in the world. STROJÍRNY POLDI, a.s. is the sole manufacturer of crankshafts in the Czech Republic and within our business sectors of Crankshafts, Rolls and Tools one of the major manufactures in Europe. Our Company history dates back to 1889, with our headoffice and production facilities still located in Kladno, near Prague.

More than 80% of our production is exported to international markets across four continents.

STROJÍRNY POLDI, a.s. delivers high-quality crankshafts for the engines of leading global brands engaged in the production of Trucks, Buses and Tractors, agricultural, forestry and construction equipment, rail and aerospace transport as well as pumps and compressors.

Our Crankshafts are made of pre-formed forgings and castings, which are machined and heat-treated with focus on exceptionally high accuracy and production quality.

Our large Rolls for cold rolling are made from forgings supplied by internationally recognized manufacturers to stringent quality specifications. STROJÍRNY POLDI, a.s.

machines Rolls to meet the Customers highest specifications in the production of sheets.

Our Tools are made of certified high-speed and corrosion resistant tool steel grades, machined to the highest production standards for metallurgy, engineering, glass, food and construction industry.

STROJÍRNY POLDI, a.s. currently employs 300 people.

since 1889

"Great history. Excellent future"
