

TOOL MANUFACTURER FROM BAVARIA, GERMANY

HOFMANN & VRATNY OHG

Our partner Hofmann & Vratny (H&V for short) is one of the **leading manufacturers of solid carbide milling cutters** – based in Steinkirchen, a small village near Munich in Bavaria. Since 1976, the company has focused on constant innovation and the continuous development of its cutting tools, which is also reflected in its extensive product portfolio.

Tools for machining aluminium, steel, cast iron, stainless steel, titanium, hardened steel, as well as milling cutters for universal machining, are manufactured to suit every application. With an annual production of two million cutting tools, the company is one of the largest milling cutter manufacturers in Europe.

Companies from the aerospace, medical and semiconductor industries, mechanical and plant engineering, and last but not least the automotive industry have been relying on the manufacturer's products for many years. The company's success is based on innovation, a culture of cooperation, open communication on an equal footing, and long-standing, successful and trusting cooperation with its business partners.

The strongest and best-known milling cutter series on the market are the EXN1 series for machining non-ferrous materials, the EXPK1 series for steel and cast iron, the EXM1 series for machining stainless steels and the BCU1 series as an allrounder for use in a wide variety of materials. In addition to new innovations, the continuous development also aims at expanding the existing product portfolio in order to meet the requirements of specific sectors on a long-term basis.

When people ask what makes the company so successful, the managing directors say it is the familiar team of 130 employees who work every day on achieving the goal of further growth. Treating each other at eye level and a culture of cooperation are at the center of the company's philosophy, which is also reflected in the great working atmosphere.
